

## **An Invitation to Join Efforts in Florida to Preserve Federal Benefits**

Over the past few years AFSA has joined with other federal and postal unions to work on the national level for the preservation of earned retirement and health benefits. Now, most of these organizations, including AFSA, are urging their members to become active on the local level, as well.

The National Active and Retired Federal Employees, which represents some five million members, has asked other federal and postal union members to merge efforts in Florida, a state that may have considerable influence on benefit issues.

In its invitation NARFE said "we are seeking individuals or groups in Florida willing to work together on shared interests. NARFE's Florida Federation, made up of 76 chapters, has an extraordinary Coalition Outreach Director, Herb Sicular. Herb lives in Delray Beach ... and is eager to work with persons in your organizations throughout Florida. His e-mail address is [joylar@att.net](mailto:joylar@att.net) . Please contact Herb Sicular directly if you are interested or have any questions."
